

superior automation and electrical solutions.

# Afrilek

Afrilek Automation was founded in 2006 by CEO, Grant Douglas. Together with his Sales Director, Pregis Naidoo, and their experienced staff members, Afrilek provides complete automation and electrical solutions, along with service and support for production facilities. With an enticing and fresh approach, Afrilek has the ability to provide E, C & I solutions for our clients. We are involved throughout every stage of the project life cycle and provide professional support after project completion.

As an ISO9001 certified company we understand that relationships are key to doing good business and work closely with our clients and partners, such as project houses, to provide our clients with the best possible solutions.

Our goal is to exceed the expectations of every client by offering outstanding customer service, increased flexibility, and greater value, thus optimizing system functionality and improving operation efficiency. Unlike most players in industry today who focus on a single technology competency, we at Afrilek understand that all technology platforms and managed services need to be interwoven and mutually supportive.

We have offices in both Gauteng and Kwazulu Natal regions and have a broad client base in South Africa and throughout Africa in various industrial sectors.

At Afrilek, we are continually expanding upon our knowledge and services to assist clients with successfully implementing Automation Systems in multiple industries throughout various locations hence making us the number one choice for a Solutions Provider.

Afrilek is accredited with Siemens in the following partner programs:  
Specialist Solution Partner for SIMATIC PCS 7, SIVACON Panel Manufacturer, Solution Partner for Process Instrumentation, Solution Partner for SIMATIC and SIMATIC HMI, Solution Partner for Energy Automation.

We also strive to make a difference in the lives of our associates and our surrounding communities hence we are involved in various socio-economic development initiatives and we proudly hold a level 3 BEE status.

**Our extensive skills encompass all aspects of implementation and operation. We provide the following services:**

**Projects**

- Engineering
- Procurement
- Management

**Panel Manufacturing**

- MCC's
- PLC and Remote IO Panels
- Server Cabinets
